DoP MO-PS-en**

1. Product type Styrene free polyester bonded anchor MO-PS, MO-PSS, MO-PSP, MO-PSW.

2. Identification

Code	Description
MOP300	Styrene free polyester bonded anchor 300 ml
MOP410	Styrene free polyester bonded anchor 410 ml
MOPSP300	Styrene free polyester bonded anchor 300 ml stone colored
MOPSP410	Styrene free polyester bonded anchor 410 ml stone colored
MOPSW300	Styrene free polyester bonded anchor 300 ml fast curing
MOPSW410	Styrene free polyester bonded anchor 410 ml fast curing
MOPSS300	Styrene free polyester bonded anchor 300 ml slow curing
MOPSS410	Styrene free polyester bonded anchor 410 ml slow curing

3. Intended use 1

Generic type: Chemical anchor for fixings with threaded rods for structural applications in concrete.

Base material: Non-cracked concrete from C20/25 to C50/60 according EN 206-1:2008. Suitable for dry, wet and flooded holes.

Material / durability: a) Carbon galvanized steel class 5.8, 8.8 and 10.9 according to EN ISO 898-1 for dry internal conditions.  
b) Stainless steel A2- 70, A4-70 and A4-80 according to EN ISO 3506 for dry internal conditions, external atmospheric exposure (including industrial and marine environment) or exposure in permanently damp internal conditions if no particular aggressive conditions exist.  
c) High corrosion resistant stainless steel 1.4529 and 1.4565class 70 according to EN 10088 for all conditions.

Loads: Static or quasi static loads.

Temperature range: From -40 °C to +80 °C (maximum long term temperature +50 °C; maximum short term temperature +80 °C)

Fire resistance: Non declared performance

Assumed working life: 50 years

Intended use 2

Generic type: Chemical anchor for fixings with threaded rods for masonry applications

Base material: Solid brick, hollow and perforated brick. Mortar strength class for brick joints mortar must be at least M2.5 according to EN 998-2.

Material / durability: Carbon galvanized steel class 5.8 according to EN ISO 898-1 with nylon or threaded sleeve for dry internal conditions.

Loads: Static or quasi static loads.

Temperature range: From -40 °C to +80 °C (maximum long term temperature +50 °C; maximum short term temperature +80 °C)

Fire resistance: Non declared performance

Assumed working life: 50 years
